

# IT Advantage

## MENTORING

### **We want to use OOAD, but where do we start?**

You know you want to improve your software development process by implementing Object Oriented Analysis and Design (OOAD). The problem is, OOAD is as new to you as it is to your staff. There are plenty of reference materials at the bookstore and on the web, but you need to get OOAD implemented as quickly as possible. You need people with experience who can quickly transfer their knowledge to your staff, but where do you find these people?

### **Experts**

ITAdvantage experts can provide your staff with training classes, as well as mentor them on an actual project. Our staff is experienced at bringing in OOAD to organizations and will assist you in customizing OOAD to fit your needs. Experience and expertise are critical to the success of implementing new processes, and ITAdvantage can give you the edge you need.

### **Training**

ITAdvantage can provide your staff with training that will help them make sense of OOAD, no matter if they come from a mainframe, client/server, or web application background. Our trainers have extensive real world experience, and they are committed to helping their students to effectively implement OOAD techniques.

### **Tools Advising/Mentoring**

Knowing what tools and techniques fit into your organization's budget and infrastructure is key to successfully implementing OOAD. ITAdvantage has experience with a wide range of tools, and can help your organization pick the ones that will give you the most benefit and stay in your budget. ITAdvantage also has experience in custom fitting OOAD in various organizations, and will be able to help your staff pick and implement the processes that are right for you.
